I operate at the intersection of data, process, and decision-making, with experience optimizing end-to-end revenue workflows across marketing, sales, and CRM systems. I've improved data quality, pipeline health, and conversion outcomes by aligning systems, automation, and reporting with GTM execution.

WORK EXPERIENCE

RevOps Analyst • Full-time Cyber Heals

Apr 2024 – Present
Chennai, TN, India

Cyber Heals is a global cybersecurity firm providing penetration testing, compliance, and managed security solutions to organizations worldwide.

- **Improved data accuracy and pipeline visibility** by consolidating 3+ years of fragmented sales and customer records from spreadsheets into a centralized CRM, enabling consistent tracking across marketing and sales teams.
- **Enabled cleaner SDR handoffs and higher-quality lead follow-ups** by designing and owning an end-to-end marketing → sales data pipeline, covering raw MQL ingestion, data cleaning, enrichment, automated drip campaigns, and CRM updates.
- **Increased conversion rates and overall pipeline health** by identifying and fixing structural issues in the marketing-sales handoff, redesigning pipeline stages, qualification logic, and automation flows to reduce UX friction.
- **Enabled leadership to identify high-performing segments and prioritize GTM efforts** by tracking and analyzing revenue and growth metrics across acquisition channels, service combinations, and churn reasons.
- **Reduced manual reporting effort by ~75% and improved decision velocity** by building automated dashboards and reporting workflows (Python, Excel) to monitor funnel health, campaign performance, and lead quality in near-real time.
- **Improved cross-functional GTM execution and campaign ROI** by partnering with marketing and sales teams to audit campaign performance, surface operational gaps, and translate insights into system and process improvements.
